August 16, 2013

To whom it may concern,

I have had the pleasure of knowing Lisa Ramsey for over ten years. When we first met we were both working for the same company and she was responsible for overseeing multiple business offices and assuring timeliness of billing submissions, making sure residents received or maintained Medi-Cal eligibility requirements, and working with Business Office Managers to assure timely collections of accounts receivable.

She was positive, thorough, understood her role and always delivered results by empowering and supporting the staff she supervised. While working with her I learned that she was dependable and a true team player willing to spend the time and energy necessary to assure success. It was a pleasure to work with her and have her on our team.

Lisa and I are no longer working together, but I do know that as the founder of Medi-Cal Consulting Services, Inc. she has built her business through hard work and great effort. It also helps a great deal to be as expert as she and her employees are in knowing the intricacies of the Medi-Cal system and how to deliver results. This would be the first company I would call if I needed to get my business office in order and improve my accounts receivable collections.

Sincerely,

Walter Hekimian

President
